SUMMARY

Full stack developer who builds and self-hosts web apps end to end, from React front ends and Node or Python APIs to Docker on my own server. Led development at a hardware startup and built a full e-commerce system for a local store. Before software, spent 8 years as a pharmacy technician and handled all of the store's IT.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Front End: React, Next.js, React Native, Expo, Vite, Tailwind CSS, Three.js

Back End: Node.js, Express, FastAPI, Socket.io, REST APIs

Databases: PostgreSQL, SQLite, Firebase (Firestore, Auth, Storage)

DevOps & Tools: Docker, Docker Compose, Nginx Proxy Manager, Git, GitHub, Playwright, ffmpeg, Postman, Figma

AI: Google Gemini API (structured output, vision), faster-whisper speech-to-text, Claude (AI-assisted development)

EXPERIENCE

Kleinman Development | Orem, UT

Jul 2022 – Present

Freelance & Independent Developer

Game Store Storefront & Inventory System (client, launching soon) | *React, Node.js, TypeScript*

- Built a complete online store and card inventory system for a local Magic: The Gathering and Pokémon shop, so the owner can sell singles online without paying for an expensive third-party service.
- Includes phone-based card scanning for intake, customer browsing of singles and sealed product, buy online and pick up in store, an events calendar, and an admin area for managing stock.

Group Recipe | *Next.js 14, Firebase, Gemini API, Docker*

- Recipe app where households share recipes, plan weekly meals, and keep a live-synced shopping list. Used outside my family too.
- Rebuilt the import pipeline so photos, web pages, pasted text, and YouTube videos all go through one structured Gemini call, cutting a typical import from about a minute to about 20 seconds.
- Kept API costs near zero by parsing schema.org recipe data without AI and caching imports for 30 days. Moved all API keys server-side and added Firebase token verification and rate limiting.

Phrame Display | Orem, UT

Oct 2023 – Jan 2025

Lead Developer (startup, equity)

- Led a two-person dev team at a six-person startup building an e-ink smart display for Kickstarter, and owned all of the product's code.
- Built the React Native phone app where users upload images and text, see what has been on their display, and send new content to it.
- Built the Android app running on the display itself. It checks Firebase on a schedule the user sets instead of staying connected, which saves battery.
- Delivered working prototypes for the live Kickstarter demo alongside the CEOs, a UI/UX designer, and marketing.

Rock Canyon Pharmacy | Provo, UT

Nov 2013 – Mar 2022

Compounding Pharmacy Technician

- Handled all of the pharmacy's IT. Set up every new computer and installed a new VoIP phone system and security camera system myself, saving the owner thousands in contractor costs.
- Troubleshooted everything from printers and point-of-sale systems to automated prescription filling machines, and introduced workflow changes that sped up filling.
- Answered medication and insurance questions from patients and doctors, and trained on the job as a compounding tech.

PROJECTS

jobhunt: Personal Job Board | *Python, FastAPI, SQLite, Playwright, Docker*

- Tracks about 75 companies straight from their hiring systems (Greenhouse, Lever, Ashby, SmartRecruiters, Workday) plus Indeed, ZipRecruiter, and Google Jobs, and surfaces 5 to 9 new local jobs a day.
- Wrote the Workday scraper (paginated POST requests, date parsing) and a distance-based location filter.

Movie Censor (moviecensor.mckaykleinman.com) | *Python, FastAPI, React, ffmpeg, Plex API*

- Family members sign in with Plex and get a copy of any movie or episode with chosen swear words muted. Finds words through subtitles first, then checks only the nearby audio, so a full movie finishes in about 45 minutes on a server with no dedicated GPU.

Lifetap (life.mckaykleinman.com) | *React, Vite, Tailwind CSS, Express, SQLite, Docker*

- Magic: The Gathering life tracker for phones and tablets with game history and win tracking, used by about 10 players.

EDUCATION

Devmountain, Full Stack Web Development Certificate, 2022 | **Mountainland Technical College**, Pharmacy Technician Certificate, 2014
